Typical Specifications

Soup kettles are constructed of spun aluminum and are available in 7 and 11 quart sizes. These units feature spun aluminum heat well, nichrome wire low watt density band elements, adjustable infinite control, and a warming light which indicates that water level or temperature setting should be checked. Kettle comes complete with stainless steel inset bowl, 3-position hinge assembly, NSF approved notched stainless steel lid, lead-in cord and plug. Soup kettles are approved by Underwriters Laboratories and listed with the National Sanitation Foundation. Printed in the U.S.A.
